

In the raised position the mattress is also automatically positioned away from the wall for easy access to the rear of the mattress

## Easy Bed Making

Bed making is hard work. Back pain is one of the most common causes of staff injury. The Perfect Sleeper mattress can be hydraulically elevated to a comfortable height, easing the risk of bed making.

The perfect sleeper can be easily opened at the foot-end of the bed revealing a valuable storage space where bed linen can be stored inside and easily accessed by house keeping staff.

## The Perfect Sleeper

Perfect Sleeper mattress is calibrated to the action.  
Available in 5.0" and 6.0" sizes.
