

Respa international

Respa international

The Irish family-owned company have been working for more than 60 years to achieve their ambition to develop the optimum sleep system that delivers that all important lasting comfort. While the outer ticking will always give the appearance of luxury and quality; the secret behind the Ri sleep experience is what lies underneath.

The uniquely designed Ri hourglass pocket spring is heat tempered, allowing it to be softer at the ends whilst still providing support. Each spring is individually pocketed, facilitating the independent movement of your guests. Ri has also combined this superior spring system with other cutting-edge sleep technologies to create the most luxurious sleep for your hotel guests.

We use only the finest materials and natural fillings in our beds, including soft lambs wool, cashmere and talalay latex, which are carefully layered to ensure that each bed provides the most sumptuous comfort and unsurpassed support for your guests.

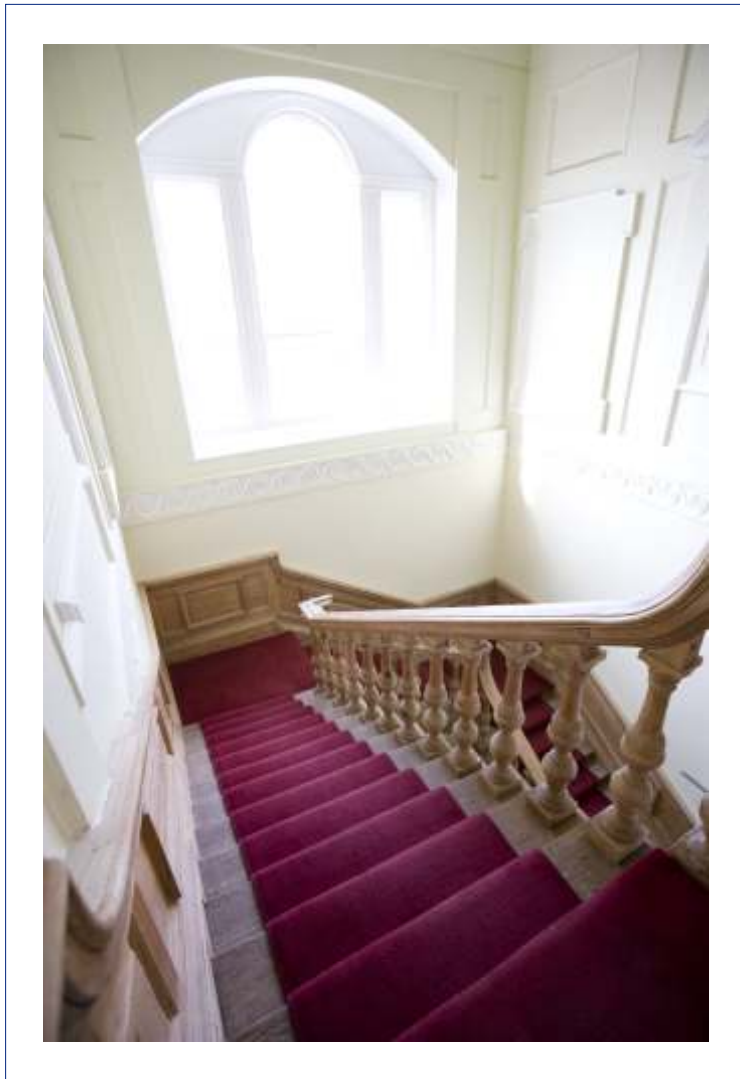

The Pocketed Collection

Vogue Sublime

Vogue Elite

Vogue excellence

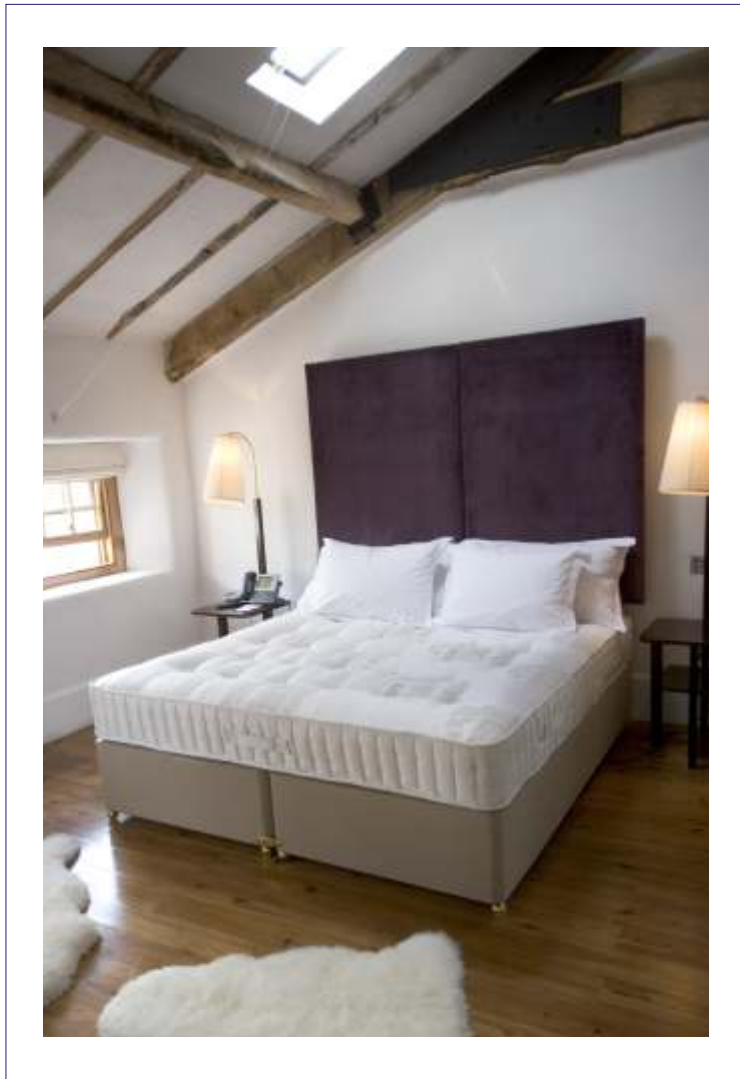

When beautiful interiors demand exquisite beds

The Vogue Sublime with layers of lambs wool and talalay latex

*The opulent Vogue Elite compliments distinctive furniture
